Education

Pimpri Chinchwad College of Engineering and Research Ravet, Pune
Graduation Year: 2027

Computer Engineering. CGPA (till current semester): **9.455**
Thesis: Fake news detection website, LinkedIn post generation website, Currency Exchange Chatbot
Relevant Coursework: Data Structures and Algorithms, Web Development, HTML/CSS/JavaScript (basic proficiency), Back-End Development, Database Management Systems, Software Engineering

Indian Institute of Technology, Madras (IITM) Chennai, TN, India
Graduation Year: 2028

Bachelor of Science (BS) Degree Programme in Data Science and Applications
Relevant Coursework: Programming in Python, Data Structures & Algorithms, Database Management Systems, Web Development, Software Engineering, Object-Oriented Programming, Statistics for Data Science, Machine Learning, Data Analysis & Visualisation.
Mode of degree: Coursework- **Online**
Assessment and Evaluation- **Offline**

Schooling
1. Dayanand Anglo-Vedic (DAV) Public School, Aundh, Pune
(10th grade CBSE). 10th grade percentage: 97.4

2. ASM's Geetamata Jr. College, Chinchwad, Pune
(upto 12th grade State board). HSC (12th grade) percentage: 76

Projects

1. Currency Exchange Chatbot
- Developed a currency exchange chatbot using **Dialogflow** and **ngrok** to provide real-time conversion responses
- Integrated intent handling and webhook logic to process multiple currency queries accurately
- Improved user interaction through automated conversational flows and API-based exchange rate retrieval

2. Fake News Detection System
- Designed and implemented a fake news detection web application using **machine learning models and classification**
- Achieved **95% classification accuracy** through data preprocessing and model optimisation
- Built end-to-end pipeline including classification, model training, and prediction interface

3. LinkedIn Post Generation Platform
- Created a LinkedIn post generation web application using **LLMs** and **machine learning techniques**
- Implemented text generation workflows to produce context-aware, professional social media content
- Implemented automated text generation using **pre-trained language models**

4. Comprehensive Data Engineering of Cab company using Databricks, AWS S3, ETL pipelines, Lakeflow, and Apache Spark

- Created a comprehensive dashboard for data engineering using data fetched from AWS S3
- Used the medallion architecture for data wrangling
- Created views dashboard for manager information

Leadership & Activities

1. TEDxPCCOE&R

- Served as **Curation Co-Head**, leading speaker research, content evaluation, and coordination efforts
- Contributed as a core organizing team member for two consecutive years, supporting event planning and execution

2. International Relations (IR) Club

- Actively participated in club initiatives focused on international affairs, diplomacy, and global policy discussions
- Collaborated with team members to support events and discussions on global issues, as well as **seeking job opportunities abroad for the students of the college**

3. Model United Nations (MUN), PCCOE&R

- Represented the French delegation in inter-college MUN conferences hosted at PCCOE&R
- Awarded **Best Delegation** for effective diplomacy, research, and collaboration

Skills & Interests

1. Technical Skills: Machine learning (supervised models for predictive analysis, unsupervised pattern recognition), Web Development, App Development, AWS Cloud services (Course certified from AWS ACADEMY)
2. Laboratory / Tools: Python, Pandas, NumPy, Scikit-learn, TensorFlow, Linux, SQL, Git, Google Colab
3. Languages: Fluent in Marathi, Hindi, English; Basic proficiency in Spanish as a foreign language
4. Interests & Hobbies: Playing guitar (7 years), Reading, Traveling, Geopolitics
